Career Objective

Computer Science and Engineering student with a good foundation in programming and problem-solving. Interested in building practical applications and learning new technologies. Looking for an opportunity to apply my skills, gain real-world experience, and grow as a software developer.

Education

B.E. in Computer Science & Engineering 2023 – Present

Sahyadri College of Engineering and Management, Mangalore

CGPA: 8.4

Pre-University (12th) 2021 – 2023

SDM Pre-University College, Ujire

Percentage: 83.33%

SSLC (10th) 2021

Sacred Heart High School, Madanthyar

Percentage: 88%

Technical Skills

Languages: C++, JavaScript, SQL, Python(Basic), Java(Basic)

Frontend: React.js, HTML, CSS, Tailwind

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman, VS Code

Core CS: Data Structures and Algorithms, OOP, DBMS, Computer Networks

Projects

Complaint Management System — Full-Stack Web Application

- Developed a web-based platform for users to report and track complaints with real-time status updates.
- Implemented secure user authentication and role-based access control using JWT.
- Built complaint submission module with image upload and location (latitude, longitude) integration.
- Designed admin dashboard to manage complaints, assign tasks, and update status (Pending → In Progress → Resolved).
- Developed RESTful APIs using Node.js and Express, and managed data storage with MongoDB.

ServiceTracker — Full-Stack Web Application

- Developed a platform to connect users with nearby service providers and track service requests in real time.
- Implemented JWT-based authentication and role-based access for users and service providers.
- Built service booking and tracking system with status updates (Pending → In Progress → Completed).
- Designed RESTful APIs using Node.js and Express, with MongoDB for data storage.
- Implemented address-based filtering to match users with service providers based on their location.

NexCart — Full-Stack E-Commerce Web Application

- Built a MERN-based e-commerce platform with user authentication and admin dashboard.
- Implemented product listing with pagination, category filtering, and search.
- Developed RESTful APIs for product, user, and order management using Node.js, Express, and MongoDB.
- Designed a responsive UI with modern CSS and optimized image handling.

Achievements

- Successfully completed a 24-hour hackathon (Skill Sangam 2025) focused on full-stack web development using MERN Stack, Next.js, and Generative AI.
- Successfully deployed and hosted ServiceTracker, a MERN-based full-stack web application, making the application accessible online.
